**YEAR ENDED SEPTEMBER 30, 2005**

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED UPON THE AUDIT PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS**

Board of Directors  
Tobolar Copra Processing Plant, Inc.:

We have audited the financial statements of Tobolar Copra Processing Plant, Inc. (TCPPI) as of and for the year ended September 30, 2005, and have issued our report thereon dated August 2, 2006. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

**Internal Control Over Financial Reporting**

In planning and performing our audit, we considered TCPPI's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect TCPPI's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements. The reportable conditions are described in the accompanying Schedule of Findings (pages 3 through 7) as items 2005-1 through 2005-4.

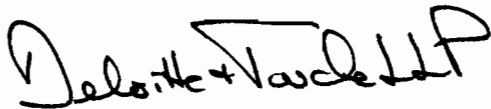

A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we do not consider the reportable conditions described above to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether TCPPI's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed one instance of noncompliance that is required to be reported under *Government Auditing Standards*, which is described in the accompanying Schedule of Findings as item 2005-5.

We also noted certain additional matters that we reported to management of TCPPI in a separate letter dated August 2, 2006.

This report is intended solely for the information and use of the Board of Directors and management of TCPPI and is not intended to be and should not be used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Deloitte + Touche LLP". The signature is written in a cursive, stylized font.

August 2, 2006

**TOBOLAR COPRA PROCESSING PLANT, INC.**

Schedule of Findings  
Year Ended September 30, 2005

Finding No. 2005-1

Criteria: Approved payroll rates should be formally documented.

Condition: Pay rates are based on a schedule that was signed by the previous General Manager, who is no longer part of the Company.

Furthermore, we noted that for one employee, there is no approved employment contract that indicates the approved payroll rate.

Cause: It appears that the Company has not documented approvals for the pay rates.

Effect: Pay rates may not be updated and there is a potential for unapproved payment rates.

Recommendation: We recommend that the Company maintain an updated payroll master file properly signed by the authorized individual.

Auditee Response and Corrective Action Plan: An Accountant will be assigned to review the personnel files of all Tobolar personnel to ensure that the personnel files have the proper documentation on the employee pay rates. The updated personnel files will be compared to the existing payroll master file and the payroll master file will be updated, as required.

The General Manager, Office Manager and Chief Accountant will review the updated payroll master file and the General Manager will approve and sign the updated payroll master file.

Schedule of Findings, Continued  
Year Ended September 30, 2005

Finding No. 2005-2

Criteria: Management should maintain sick leave accruals.

Condition: The Company does not keep a sick leave subsystem to monitor sick leave earned and used.

Cause: It appears that the Company has not instituted proper control over the monitoring of sick leave.

Effect: Sick leave could be incorrectly paid or accounted for.

Recommendation: The Company should maintain a sick leave subsystem that tracks leave earned and utilized.

Auditee Response and Corrective Action Plan: The Chief Financial Officer will assign a Senior Accountant to develop a sick leave accrual tracking system. Also, the Senior Accountant will memorialize the procedures for reimbursement of sick leave.

Schedule of Findings, Continued  
Year Ended September 30, 2005

Finding No. 2005-3

Criteria: An adequate inventory system should be utilized.

Condition: As has been the Company's practice, inventories are expensed upon purchase. At the end of the year, inventory is recorded based on actual quantities. This practice prevents proper monitoring of inventory on hand.

Cause: It appears that the Company was unable to assign a specific individual to account for inventory records.

Effect: Inventories may not be properly monitored and there is an opportunity for unauthorized usage.

Recommendation: The Company should consider recording inventory quantities upon purchase. A regular cyclical count can be performed to ensure that inventory quantities are correct and variances, if any, should be investigated.

Auditee Response and Corrective Action Plan: The inventory will be maintained on the books starting on October 1, 2006 when the accounting for Tobolar is implemented on the MAS 90/200 software. Tobolar has been set up on MAS 90/200 and the connectivity issues have been resolved. There will be a physical inventory of all categories that will be reconciled to the inventory records on a monthly basis.

**TOBOLAR COPRA PROCESSING PLANT, INC.**

Schedule of Findings, Continued  
Year Ended September 30, 2005

Finding No. 2005-4

Criteria: Monitoring of rear cart sales and deliveries should occur.

Condition: Certain rear cart issuances were not properly recorded. Furthermore, certain deliveries were cancelled but were still recorded as sales.

Cause: It appears that the Company does not compare rear carts deliveries with applicable sales invoices.

Effect: Inventories and receivables may be misstated.

Recommendation: The Company should consider performing a regular count of rear carts and reconcile rear carts delivered to actual sales invoices.

Auditee Response and Corrective Action Plan: The Chief Financial Officer will assign a Senior Accountant to review the procedure for recognizing cart sales related revenues and returns. Based on this review, the Senior Accountant will develop a procedure for accounting for cart sales that will address the revenue recognition on cart sales and the procedure for accounting for returns. The Senior Accountant will develop a procedure for conducting an inventory of carts. The inventory will be by component parts and not by assembly carts.

## TOBOLAR COPRA PROCESSING PLANT, INC.

Schedule of Findings, Continued  
Year Ended September 30, 2005

### Finding No. 2005-5

Criteria: Public Law 1992-2, enacted on February 17, 1992, established the Tobolar Copra Processing Authority (the Authority). Pursuant to this law, the Authority was specifically authorized and directed to enter into appropriate arrangements with TCPPI for the assumption of all rights and title to any and all assets, equipment, contracts, liabilities, rights, obligations, functions, powers, etc., that TCPPI may have or control, including all rights to the use of the name "Tobolar." This assumption was to occur once TCPPI had been liquidated.

Condition: TCPPI has not been liquidated and all rights and title to any and all assets, equipment, contracts, liabilities, rights, obligations, functions, powers, etc., that TCPPI has or controls have not been assumed by the Authority.

Cause: The cause of the above condition is that the requirements of Public Law 1992-2 have yet to be met.

Effect: The effect of the above condition is that TCPPI is in noncompliance with the requirements of Public Law 1992-2.

Recommendation: We recommend that management of TCPPI take steps to comply with the requirements of Public Law 1992-2. Such steps should include the consultation of legal counsel.

Prior Year Status: Noncompliance with the requirements of Public Law 1992-2 was reported as a finding in the audits of TCPPI for fiscal years 1994 through 2004.

Auditee Response and Corrective Action Plan: The Chief Financial will contact the Chairman to discuss complying with Public Law 1992-2 and to obtain approval to contact the Attorney General to initiate the appropriate legal actions required to comply with Public Law 1992-2.

Please note that only the Attorney General can provide legal services to the Republic of the Marshall Islands Governmental Entities. Thus, the Attorney General will set the time table for compliance with Public Law 1992-2.
